Sempermed is a vertically integrated manufacturer that provides focused sales, marketing, and logistical support to those in need of hand protection.

It's called fusion bonding. Our special manufacturing process actually infuses synthetic polymers into the latex of our Polymed® brand gloves. This creates a multi-layer glove that combines the elasticity of latex and the strength of copolymers, as well as protection against cracking and peeling during normal usage. Other manufacturing processes may simply apply a topical copolymer coating to the latex glove. But without fusion bonding, copolymers can fracture, creating particulate residue, and possible delamination.

## FEATURES

- 50 micrograms or less of total water-extractable protein per gram
- Powder-Free
- Multi-layer, fusion bonded
- Micro-rough textured surface

## BENEFITS

- Reduced potential for allergic reaction
- Eliminates the potential aerosolization of glove powder and powder associated transfer of chemical allergens
- Enhanced strength and durability, quick and easy to don
- Improved tactile sensitivity with increased gripping characteristics

### SURFACE TREATMENT

Halogenation/siliconization and extensive washing in water

### PRODUCT COMPOSITION

- Natural Rubber Latex
- Sulfur, Zinc Oxide, Organic Accelerators (dithiocarbamates, benzothiazolate)

Caution: This product contains natural rubber latex which may cause allergic reactions. Safe use of this product by or on latex sensitized individuals has not been established.
